Social Justice Ireland have released the following interesting statistics. Since the onset of the recession the number of people in poverty in Ireland has increased by more than 100,000. Today there are more than 750,000 people living in poverty in Ireland. More than 57 per cent of those in poverty are people who are retired, students, people in caring roles, people who are ill or people with a disability. If Government wishes to address and close this divide future policy must prioritise those at the bottom of the income distribution. These policies must be designed to address the wide variety of households and adults in poverty. We, as Church have a voice in this. Killaloe Diocese JPIC committee encourages you to write to your local politician and local representatives to ensure they are working hard to alleviate this issue.
